PROFESSIONAL SUMMARY

Performance-driven Meta Ads & AI Automation specialist with 6+ years of digital marketing experience — specialising in full-funnel Meta Ads campaigns, AI-powered lead automation, and scalable agency systems. I don't just run ads — I build systems around them: automated lead capture via n8n, WhatsApp follow-up sequences, CRM routing, and real-time performance dashboards that turn ad spend into measurable revenue. As a Digital Marketing Instructor, I have trained 300+ learners across 17+ batches at ASDC Kanpur and NDMIT Agra, delivering live-project-based curricula across SEO, paid ads, social media, and AI tools. Additionally, I have independently built a full-stack agency management platform using Next.js, Supabase, and n8n — demonstrating hands-on ability across marketing strategy, automation architecture, and product development.
